

## VOGUE LASER CLINIC

Great News ! Vogue will be opening back up **May 1, 2020**, for in-office appointments. We are so excited to see each and every one of your smiling faces. We are dedicated to making sure the safety of our clients and staff is our number one objective. We are also following regulations set by government agencies to protect everyone's health and safety.

Here are some of the measures we are implementing. They include but are not limited to:

- We ask that anyone with a fever or any flu-like symptoms to please stay home and we will reschedule your appointment
- Please bring and wear a mask to your appointment
- We ask you to please wait in your car until your appointment time, in order to limit the number of our guests in our space at a time. Our staff will set up text communication with you.
- Please do not bring additional guest or children to your appointment
- Our Estheticians will be disinfecting every room and station between appointments
- We have provided a Hand Washing Station for clients

Staff / Estheticians will be wearing masks/gloves at all times

We are so happy and excited to re-open and to see you all!
